PREFACE.

This Brand Book is compiled from the Records in the Brand Recorder's Office at Medicine Hat. While the greatest possible care has been taken to ensure accuracy, it is quite possible, where so many thousand brands are involved, that mistakes have occurred. Where such are found, the Recorder will be glad to have them pointed out for correction in next year's supplement. It must be borne in mind, however, that a brand cannot be altered in the body of the Brand Book unless it is first changed on the records.

Owing to the manner in which the older series of brands were prepared and entered upon the records, it has not been found possible to arrange these alphabetically. For instance, the series BB and numerals will all be found under the letter B, although it may read 2BB or 0BB, while the single letter and numeral series with bar or other design, although reading—5C or $\hat{6}C$ will be found under the letter C.

JAMES WILSON,
Recorder of Brands.

Office of the Recorder of Brands,

The Northwest is the original home of Fleming's Lump Jaw Cure. Stockmen who used it ten years ago are using it to-day, and some have reported curing more than a hundred cases without a single failure.

Fleming's Lump Jaw Cure is not an experiment, but a demonstrated success. Your money refunded if it ever fails.

HALF - TONES

are the most perfect as well as the most economical means of reproducing photographs in print. This kind of engraving is made in several degrees of fineness of screen to accommodate the half-tone to rough and smooth paper, smooth surface paper, and fine-screen half-tones—if made as **The Stovel Company** make them—produce the most perfect results.

The difference in the quality of half-tones is greater than the difference in quality of photographs. You would not employ an unskilled photographer to make your photos. You should employ **The Stovel Company** to reproduce them.
